

single lock feature

The single lock Softbinder offers smooth and secure attachment with an eyelet that neatly tucks away the remaining part of the tie.
(This prevents unintentional opening of the lock.)

double lock feature

The double lock Softbinder allows the fastener hold and attach two separate objects or bundles. It has two closures in which the strap can be locked in place.

features

✓ highly flexible material

👍 easy to open

☀️ weather resistant

↗️ tear resistant and elastic

♻️ reuseable

💧 gentle, secure hold
